PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5+ years of experience architecting and scaling fintech, ERP, AI, and SaaS applications. Proficient in designing and delivering end-to-end web applications using TypeScript, React, Node.js, and modern JavaScript technologies. Proven track record of translating complex business requirements into secure, scalable, and high-performance software solutions.

EXPERIENCE

Full-Stack Software Engineer – DamDam Global Jul 2024 – Jun 2026

- Led frontend development for Pay4it, a fintech tax collection platform used by the Lagos State Revenue Service (LIRS) for secure digital tax payments.
- Built responsive payment, tax management, and reporting interfaces using React, improving usability and operational efficiency.
- Developed internal tax administration tools that increased processing efficiency by 40% and served over 10,000 taxpayers.
- Built MadamShikini, an AI assistant that handled 50,000+ monthly taxpayer inquiries and reduced response times by 60%.
- Collaborated with backend engineers, designers, and product managers to deliver scalable government and fintech applications using React, Node.js, Express.js, and SQL databases.

Full-Stack Engineer - Facilitator (Part-time) – FindWorka Oct 2024 – Sep 2025

- Delivered technical training across 3 software engineering cohorts, including 2 full-stack and 1 backend program.
- Taught 100+ developers across Africa through virtual and in-person sessions on HTML, CSS, JavaScript, React, Node.js, Express.js, SQL, and REST APIs.
- Designed and delivered a backend engineering curriculum covering API development, databases, authentication, testing, and deployment.
- Mentored students through project development, code reviews, debugging sessions, and career guidance, helping them build production-ready applications.
- Collaborated with instructors and program managers to improve course delivery, maintain curriculum quality, and enhance student learning outcomes.

Full-Stack Developer – Dancerapy Jan 2023 – Jul 2024

- Sole software engineer responsible for developing, maintaining, and scaling Dancerapy's web platform using React, Node.js, Express.js, and MySQL.
- Partnered directly with company leadership to translate business goals into technical solutions, delivering features that increased user satisfaction by 30% and retention by 10%.
- Designed a scalable video storage architecture that supported rapid growth in user-generated content without performance degradation.
- Integrated a high-performance video playback solution that improved playback speed and reduced server load.
- Built a subscription payment system that reduced failed transactions and improved the customer payment experience.
- Planned and shipped end-to-end product features, from database design and backend APIs to responsive frontend interfaces and deployment.

Frontend Developer – Ancla Technologies Feb 2022 – Nov 2022

- Built Obade, a bill payment platform, implementing responsive interfaces and secure payment workflows.
- Contributed to the development of Maildrip, an email marketing platform, by building and maintaining React-based user interfaces and integrating REST APIs.
- Built reusable UI components that improved development efficiency and maintained consistency across applications.
- Collaborated with designers and backend engineers to deliver scalable, user-friendly web applications aligned with business requirements.
- Optimized application performance, responsiveness, and cross-browser compatibility across modern browsers and devices.

Junior Full-Stack Developer – Kescreative

Apr 2021 – Jan 2022

- Developed responsive, mobile-first web applications using HTML, CSS, JavaScript, React, Node.js, and SQL.
- Built and maintained client websites, landing pages, and internal business tools tailored to client requirements.
- Integrated frontend applications with backend APIs and databases to deliver reliable, end-to-end functionality.
- Collaborated with senior developers and designers to implement new features, resolve bugs, and improve application performance.
- Participated in the full software development lifecycle, from requirements gathering and development to testing and deployment.

Junior Frontend Developer – Titan Galaxy

Feb 2020 – Apr 2021

- Assisted in the development of client web applications using JavaScript, HTML, CSS, and React.
- Set up new projects, configured development environments, and established initial codebases for engineering teams.
- Collaborated with senior engineers throughout the software development lifecycle, from implementation to testing and deployment.
- Contributed to feature development, debugging, and testing to improve application quality and reliability.

EDUCATION

BSc. in Chemistry, Federal University of Agriculture, Abeokuta

Feb 2018 – Feb 2023

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, TanStack Query, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Ant Design

Backend: Node.js, Express.js, NestJS, PostgreSQL, MySQL, MongoDB, Redis, Mongoose, Prisma

Tools: Git, Docker, AWS, Postman, Figma, Jira, GitHub Actions
